

CURRENT VACANCY

Engineering Factory Labourer

Full-time position for immediate employment as a factory-based labourer.
This is a full-time position for immediate employment 40 Hours – Monday - Friday

The work involves cleaning a wide and diverse range of machine tools; woodwork, engineering and fabrication machines for re-sale and general factory work that will require you to lift of weights up to 25kg.

Some driving may be required so a full driving licence is essential.

Work.

The work mainly involves cleaning machinery, keeping the premises both internally & externally clean, tidy, and well organised.

You will also be supporting our fitter/s as well as doing some dismantling and assembly work therefore the role would suit a candidate with engineering/mechanical based practical experience or knowledge although this is not essential as full training will be given.

The job is a physical role and will involve heavy lifting, so we are looking for an enthusiastic person to join our small rapidly expanding team.

Work involves lifting, moving and handling machinery and tooling therefore experience using various handling & lifting equipment, fork-lift trucks, pallet-trucks would be desired although training may be given to the right candidate.

There may be a small amount of driving to collect and deliver spares or to accompany fitters to assist during site visits so a full driving licence is essential.

Current references and DBS checks will be required.

Email CV and covering letter outlining your key skills to info@rondean.co.uk
